

Umler Changes

Build Date M/D/Y **mandatory**

All dates now must be month/day/year in mm/dd/yyyy format

Built Date **Mandatory** BLDT

The date the construction of the equipment is complete

Data is Confidential. Used for Transportation Codes. Value does not carry forward for Single Clone / Multi-Clone.

Range of Values for BLDT

Minimum 1/1/**1900**

Maximum 12/31/9999

Age (based on Bld Dt) >98 AAR drop dead DSTM & PSGR

AAR arbitrary rolling 99 year drop dead was making older cars & locos RFI. No such regulatory provision on DSTM and S4045 cars, accepted and implemented because S4045 is an industry standard and Amtrak has 100 year old certified PVs. Build date backed up to fixed date 1/1/ 1900 approved. Now we don't have to lie about the build date.
